# Robinson Facial Plastic Surgery

### Dear Friends,

As we finally enter Fall. I hope this post finds everyone doing well... no doubt my favorite time of year. This past weekend's weather was phenomenal! Besides the change in weather, Fall, also, brings on many other things that make it so special, such as the Fall colors, sweaters, and Football. (For all you SEC fans, my alma matter -University of AZ - is finally ranked @ # 13!)

Also, every Fall we have our Patient Appreciation Day! Last week's event was the busiest yet; not just with people coming in for the treatment specials, but many of you stopping by to stay hi, grab a bite to eat, and most, importantly, share a part of your busy day with us. It's so great to have a practice that feels like family, as exhibited by so many that came by to visit! Thanks again for making that day so great.

Fall is, also, the time that the American Academy of Facial Plastic Surgery has its annual meeting. I was flattered to be asked once again to speak at the meeting. As usual, there was a lot of new techniques, injectables, and technology that I had the chance to learn about, and plan on sharing some that with you throughout the upcoming posts so stay tuned.

Finally, Dr. Vleggar from France, who has some of the most extensive experience in the whole world using Sculptra, spent a day with me in the office working side by side, as we treated patients with Sculptra. During the day we shared alot of ideas, and I walked away with some great "pearls" that I will use from now on. With these new techniques we are able to replace volume loss better than ever in the face giving an even more natural and long lasting result. I look forward to sharing some of this with you in the upcoming months.

As you can see, at Robinson Facial Plastic Surgery there is a lot of change - all good- going on besides the weather. My staff and I hope that you too are experiencing positive change rolling into the Fall and look forward to seeing you soon in the office.

Hope to see you soon,

*Burke Robinson M.D.*
