

First Visit

Welcome to our practice. And here's what to expect at your initial appointment.

When you come in, we'll ask you to bring the following forms with you:

Patient Welcome, signed and dated
Patient Registration, filled out completely
Medical History, filled out and signed
General Informed Consent, signed and dated
HIPPA Form, signed and dated
Personal Smile Quiz, filled out
Financial Question, signed and dated

These forms are important—they help determine the course of your treatment. We have to know about allergies, sensitivity to anesthetics, long-term medications—your whole health picture.

We will then need an hour or so to examine your teeth, gums, jaw alignment, and soft tissues. We'll take digital x-rays and photos to find areas of infection that need treatment, and if necessary, hard cast models will be made to examine your bite. The exam includes a blood pressure check and oral cancer analysis—again, to assess your total health. We will do our very best to handle all of your dental concerns.

We look forward to meeting you.

Very truly yours,

Dr. Simpson and the Team
